33-03-11-05. Minimum standards for licensure.

1. An applicant for licensure must meet the minimum standards prescribed by this subsection.

- a. The applicant must be at least eighteen years of age.
 - b. The applicant must have a general education equivalent to the completion of four years of high school or certificate of general educational development.
 - c. An electronic hair removal technician must have successfully completed a course in an electrolysis school which meets the minimum standards as set forth in section 33-03-11-08 in electronic hair removal in the technique of removing hair other than through the use of the electric needle. The applicant must provide one letter of recommendation for the issuance of a technician license from one instructor knowledgeable in the electronic hair removal process without the use of an electric needle.
 - d. Written procedures for aseptic techniques acceptable to the department must be developed and implemented by the licensee.
2. Electronic hair removal technicians practicing or holding a license to practice from the North Dakota board of hairdressers and cosmetologists on June 30, 1979, will be deemed qualified and will be issued their licenses upon certification from the board as to the existence of such licenses. All other applicants for a license must document their qualifications for licensure in accordance with this section.
 3. A licensed electronic hair removal technician is not permitted to remove hair with the use of the electric needle, but is permitted to practice any other method of hair removal.

History: Effective September 25, 1979; amended effective February 1, 1992; May 1, 1994.

33-03-11-08. Recognition of curriculum.

1. The department will recognize an applicant for a license as eligible for a license when the applicant has graduated from a school which has provided at a minimum two hundred hours of training in the following curriculum areas taught by instructors:

- a. Practical training in the following branches of electrolysis:

Sanitation and sterilization
as applied to electrology

Patron protection

Universal precautions

Use of the electrical currents

Use of equipment and instruments

Precautionary measures to observe
before and after treatment

Immediate aftercare

Home care (patron instruction
in home care)

Destruction of the papilla

Observation (demonstration and
result of work)

Note: At least two-thirds of the hours
in this subject shall be in
actual performance of services
on another person.

- b. Theoretical and practical training
in the following:

Ethics, professional conduct

Optional and unassigned hours

- c. Theory covering the following subjects:

Sanitation and sterilization
as applied to electrology

Universal precautions
